

NATIONAL LIVING GUIDELINES FOR ADULT COCHLEAR IMPLANTATION

NHMRC PARTNERSHIP PROJECT

Many eligible adults who could benefit from a cochlear implant face delays in referral and access to care. This project unites researchers, clinicians, academics and health systems to close that gap and improve hearing healthcare.

[MAGICAPP: ANZ LIVING
GUIDELINES FOR
COCHLEAR IMPLANTATION](#)**

OUR GOALS

- Improve awareness of cochlear implant candidacy
- Support timely referral and assessment
- Understand barriers to access and care
- Promote equitable, person-centred hearing healthcare
- Translate research into clinical practice and policy

GET INVOLVED

We welcome opportunities to engage with:

- **Adults with hearing loss, cochlear implant users, and carers** by sharing experiences and perspectives.
- **Audiologists, ENT specialists, and hearing health professionals** interested in collaborating on research and implementation activities.
- **Health service providers and cochlear implant programs** seeking to improve referral pathways and access to care.
- **Policy and advocacy partners** committed to improving equitable access to hearing healthcare.
